

Garnock Education Campus

A £36m state-of-the-art facility, the Garnock Education Campus merges and relocates two schools, Garnock Academy and Glengarnock Primary School.

Project Profile

The facility will cater for 1,500 students - 1,200 secondary and 300 primary as well as providing community facilities such as a six-lane 25m swimming pool and fitness suite.

To support a cost effective installation a range of Pegler materials were chosen for specific applications such as VSH XPress Copper for the hot and cold water services, VSH XPress Carbon for heating and cooling whilst VSH XPress Stainless Steel was installed for gas applications. In addition, Keir took advantage of Peglers' Warranty Plus, an assurance guarantee for the complete system installation, water treatment and commissioning.
