

# Quarry Gardens Residential Home

Pegler Yorkshire and its renowned VSH Tectite push fit system has once again delivered a fast and efficient heating conversion. Quarry Gardens Residential Home in Portadown, a property owned by Alpha Housing, had its new system installed by local installer, Fusion Heating.

## Project Profile

Opting for VSH Tectite Carbon in this particular instance, the upgraded system supported an efficient and reliable heating system for the multi-occupancy residential home. Push fit technology continues to drive forward efficiencies across the plumbing and heating sector and is entirely suitable for heating and potable water applications. Its range of plumbing components, creating an end to end solution includes elements made from Copper, Brass, Gunmetal, Stainless and Carbon steel and negates the need for specialist tools and hot works permits making for a faster, safer installation.

The project also delivered cost savings when compared with other installation methods particularly with regard labour costs as the system is renowned for streamlined, labour saving installations. VSH Tectite Carbon is available in 15-54mm and supports heating and water applications.
